Process Automation Tool Kit (PAT)

- It provides an innovative method to automate test procedures for the Freedom range of communications analysers.
- PAT enables the test engineer to develop test procedures by a simple and intuitive control interface by simply selecting from a library the function required and insert into the DUT test script.

Connection to the Test Set

- Connection to the Analyzer is RJ45 Ethernet, either directly from a PC or over a LAN network.
- Test scripts are executed from the PAT control interface
- Test results saved to USB of a network location.

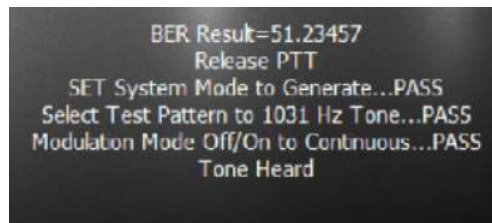

Intuitive Interface:

- Automatic IP Address Search
- Programmable Actions library
- Easy drag and drop actions to the Sequential Test Process
- All Parameters from the Test Set available

Your Benefits:

- No programming skills are required
- Intuitive Interface
- Comprehensive test reports

Process Automation Toolkit Specifications

Name	Description
Software location	
Download location	https://freedomcte.com/upgrades/
Analyzer Requirements	
Serie	Compatible with R8000/R8100/8200/8600
Option key	R8-PAT
Firmware	3.4.2.0 or later
Analyzer Connection Options	
From a PC	Direct Connection to RJ45 Ethernet socket.
LAN Network	Network connection through RJ45 Ethernet socket
Test scripts	
File format	tst
Test results	
File format	CSV
Export	Test results can be saved on a network location and exported to a USB drive

The manufacturer reserves the right to implement technical changes.
