radio frequency equipment

## The Transit Case for R8000 Series

It consists of a hardcase with interior foam molding specifically designed to store, transport and protect the Freedom R8200/R8100/R8000 Communications Analyzer and accessories.

### CUSTOMIZED INTERIOR FOAM

The transit case has an interior made from a dense and impact-resistant foam that guarantees the product is securely packed.

The foam insert has been specifically tailored to fit the Freedom Glove Case (R8-GC) with the Test Set and accessories including the VSWR Bridge.

### MULTILAYER

The multilayer feature is a handy solution that allows you to:

- save space, stacking items on top of each other
- keep items locked firmly in place
- have easy access and superb organization

## SUPERIOR QUALITY BUILT TO LAST

The hardcase shell is made of high-impact polyethylene (PE-HD) and withstand even the most extreme physical stresses.

It offers an extra layer of protection to the equipment inside against dust, water, impacts and scratches.

- Lightweight
- Retractable handle extension
- Foldable handles
- Easy to open two-stage locks
- O-ring seal
- Stainless steel fittings and padlock protection
- Automatic pressure equalization valve
- Built-in wheels

waterproof | shockproof | dustproof
